◇	Paper Faced/Plastic Film Faced mosaics have a covering of paper or film on the front surface rather than mesh backing. Some individual pieces are clear/translucent so any mesh backing would show through after installation to spoil the overall look. Use a white, rapid setting, cement based flexible adhesive. Because the film or paper facing is on the front of these mosaics it is difficult to see what they look like. Peel back part of the paper or plastic face on one tile BEFORE fixing to ensure the surface finish is what you expected. Plastic film faced mosaics should be adhered in the same way as other mosaics, but with the film facing outwards. Leave the adhesive for at least 24 hours to allow it to completely set and dry before peeling off the film. If it's necessary to make slight adjustments to straighten the mosaics before the adhesive sets, then cut the film carefully with a sharp knife. If the small pieces of mosaic come off when removing the plastic film it means that the adhesive has not been left long enough to dry. Use a sharp knife and cut small slits in the film to allow more air to the adhesive to speed up the process. When the adhesive is dry, remove the film by peeling it from one corner to the opposite corner. Some mosaic sheets may have a protective film covering either the whole surface or certain individual pieces. Keep the film in place during installation then carefully peel away. It is important to factor in time needed to peel off the film from some of those with film on individual pieces
◆ ▨	Epoxy primer, adhesive and grout recommended Epoxy primer and adhesive with a non-sanded or superfine grout recommended
●	Shower walls only , not walls in wet rooms or steam rooms
❖	Will fade in direct sunlight
✱	Contain metal. Extreme caution must be taken when using metal mosaics in an electric shower. Always consult a qualified electrician before installation. Considerable care needs to be taken when installing Fusion Micro IM-0014504 and Torque IM-0010378 as they have very sharp edges. Wear thick protective gloves when handling these mosaics. Torque should only be installed in situations where it will not be touched or brushed past as the surface is three dimensional and some edges will be sharp even after installation. Do not install in areas where it can be brushed past or where small children will come into contact with the surface. It is important to take this into account before choosing this product. Make sure that the grain of stainless steel is going in the same direction for all mosaic sheets otherwise it will affect the appearance of the installation. Some metal mosaics have a protective film covering either the whole surface or certain individual pieces. Keep the film in place during installation then carefully peel away. It is important to factor in time needed to peel off the film from some of those with film on individual pieces.
★	Mosaics containing or made from copper are not suitable for kitchens, bathrooms, showers and wet rooms or exposure to excessive moisture. When exposed to air and moisture the copper may, over time, form a patina of verdigris (a green coating). It is vital that this feature is taken into account when choosing copper mosaics.
✚	Seal before use
✿	Use white , rapid setting cement latex based flexible adhesive and a non-sanded or superfine grout unless stated otherwise
♣	Some mosaics may have chipped edges . This is an inherent part of these tiles and add to the rustic effect
▲	Do not grout
✦	Cutting Instructions Please see the website for details https://www.originalstyle.com/fixing-guides

For important installation advice please see our fixing guides

DIMENSIONS

Nominal dimensions for all Original Style Glassworks tiles are shown throughout the brochure. Actual dimensions for individual tiles may vary from these figures. We recommend you allow for at least an additional 5% for cutting/wastage.

*All of the above dimensions are subject to a tolerance of $\pm 25\text{mm}$ or $3/32"$. Quantities shown exclude grout gaps between each tile. Please allow an additional 5% for cutting/wastage.
